

“At Sensory Dimensions we conduct consumer research on behalf of our clients to help them develop and improve their products. Statistical analysis is fundamental in understanding our data so clients get the best results possible.”

*Tracey Hollowood, Director of Sensory and Consumer Research, Sensory Dimensions Ltd.*

Qi Statistics Ltd has been promoting the use of statistics in the commercial world since 1989. The success of our company is down to the commercial benefits our customers get from the statistical techniques we teach and apply. We are pleased to support the promotion of statistics through World Statistics Day.

## Up Coming Training—see website for further details

- Maximising the value of your data using EyeOpenR—Melbourne, 25th Nov. 2015, 2 days
- Hands-On Essential Sensory Statistics—Brisbane, 2nd December, 3 days
- Maximising the value of your data using EyeOpenR—U.K. February 2016, date and venue to be confirmed

Statistics help decision makers develop informed policies with better outcomes that eventually result in better lives for us all.

The first World Statistics Day was declared by the United Nations General Assembly on October 20th 2010. This year we celebrate it on the same day, October 20th, when the statistical community are encouraged to showcase their achievements. For more information see:

<https://worldstatisticsday.org>

## Associate Statistician

We are looking for an associate statistician to work with us on a part-time basis. We deliver statistical services to a wide range of industries and are one of the world's leading providers of consultancy and training to the sensory and consumer market.

The role will primarily involve analysing data from a range of different companies and industries, and producing reports often to customer specification. However there may be more varied work such as client meetings, analysing data in a variety of software packages or writing and delivering training.

It would particularly suit someone who wants to work flexible hours mainly from home, is self-motivated and task orientated.
