

## SenPAQ by Qi

Version 6

- ◆ Panel Performance sheets updated
- ◆ New summary plots for Discrimination, Consistency and Repeatability
- ◆ Significance tests for Pearson's and Spearman's correlations
- ◆ Type I and Type II Sums of Squares for ANOVA
- ◆ Minor changes and bug fixes
- ◆ Fully compatible with Excel 2013

Assessor Performance Summary Table is now fully consistent with the summary chart.

**Now available**

**Summary Table of Assessor Performance (high good)**

	Assessor 1	Assessor 2	Assessor 3	Assessor 4	Assessor 5	Assessor 6	Assessor 7	Assessor 8	Assessor 9	Assessor 10	Assessor 11	Assessor 12
#Sig. Discriminating Attributes	8	10	7	6	8	6	9	11	7	8	7	13
#Acceptably Repeatable Attributes	20	14	9	17	9	19	20	20	19	14	11	19
#Acceptably Consistent Attributes	15	9	12	15	6	16	18	18	18	16	12	8
<b>Total</b>	<b>43</b>	<b>33</b>	<b>28</b>	<b>38</b>	<b>23</b>	<b>41</b>	<b>47</b>	<b>49</b>	<b>44</b>	<b>38</b>	<b>30</b>	<b>40</b>

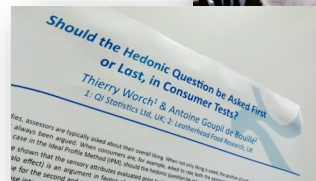

**Pricing:** Upgrade from V5, First copy £200, second and subsequent copies £100.  
First new V6 licence £650, second and subsequent licences £200.

### EuroSense 2014: Qi was well represented at Eurosense in Copenhagen

As well as presenting several posters and a talk at the conference, it was great to catch up face-to-face at our booth with both existing customers and other companies. Special interest was shown in our updated training brochure, our consulting work and our partnership with Logic8 ahead of the EyeOpenR software release in November.
