

Senior Product Innovation Scientist / Liquid Technologist

Location: Hertfordshire

Up to 12 months

Salary: DOE

Rum and raisin, lemon and lime, gin and tonic – Some things just go together, but if you are the kind of person who also knows that pecan and maple, coconut and lime, and gin and orange work together just as well, then this might be the job for you.

A new and exciting role has come up within a global beverage company. Our client is looking for a creative, motivated food and beverage scientist to join their Innovation, Research and Development team as a Senior Product Innovation Scientist / Liquid Technologist.

You will join a fast-paced R&D team of professionals in their Hertfordshire site, creating new differentiated products for the global market, and delivering technical solutions within allocated budgets.

Responsibilities:

- Create high quality products (liquids and beverages) that meet the global consumer and customer demands
- Turn creative ideas into tangible commercial products
- Develop, review, and manage multiple projects simultaneously
- Manage budgets and deliver projects within deadlines
- Adhere to the different legal and regulatory requirements of different markets
- Collaborate with the Analytical, Sensory teams and pilot plant to produce liquids across a number of categories

Essential:

- A Diploma / BSc. or equivalent in Science, Chemistry, Food Science, or other relevant Subjects
- Proven experience of food and beverage project management and research experience in industry or academics
- Proven record of successful project management
- Creative approach to problem solving
- Commercial and consumer knowledge that can be leveraged in the innovation process
- Working collaboratively with a multidisciplinary team
- Multi-tasking – manage 2-3 projects at the same time
- Able to work independently
- Effective communication skills – able to translate complex technical issues into clear and concise messages for a varied audience
- Able to work cross functionally and across different markets

If you have a creative flair and love to see your ideas come to life. This could be your next job!

If this represents an opportunity you would be interested in and your CV reflects the key areas mentioned above then please apply now.
